OUR BLUE WAY

TRAVEL BLUE IS COMMITTED TO A SUSTAINABLE WORLD

Travel Blue Group has been a leader in the global travel retail market for over 36 years. 25 years ago, we revolutionized the industry by being the first company to use recycled cardboard packaging while others continued to rely on plastic. We also led the way in sustainability by being the first to use soy-based ink.

In 2022, we launched “Our Blue Way,” an initiative that underscores our commitment to sustainability. “Our Blue Way” means prioritizing sustainability in aspects of our operations. Sustainability, to us, is more than using recycled materials and soy-based ink. It’s about actively reducing the use of plastic, recycling paper to bring down deforestation, using smaller packaging to reduce packaging materials, and also minimizing space in transportation to save energy. We believe that sustainability and quality go hand in hand. As part of “Our Blue Way,” we remain fully committed to converting as many existing products as possible to recycled or recyclable materials and introducing new products that align with our sustainability mission.

These products are easily identified by the presence of our green sustainability logo on the packaging, indicating the compliance of our sustainability standards. To date, over 70% of all Travel Blue products are sustainable.

Our pledge is to reduce our environmental impact and help our customers achieve their sustainability goals while providing them with products of unrivalled quality.

Together, we can pave the way for a greener, more sustainable future - one product at a time.
